Cette formation est la formation à suivre pour faciliter l'acquisition des élèves et à les faire parler de manière plus authentique et plus spontanée. La théorie et la pratique étaient très bien calibrées de sorte qu'on a pu observer et utiliser l'approche neurolinguistique avec de vrais élèves. Les formateurs ont donné à chacun des repères sur comment adapter à nos contextes d'enseignement (le public, le nombre d'élèves, les exigences de l'établissement).

### WHAT OUR STUDENT - TEACHERS SAY

Cette formation a répondu à mes attentes. Je connais mieux les principes de l'ANL et je sais maintenant les mettre en pratique. Les formateurs sont à l'écoute et ils partagent leurs expériences. Cette formation est pratique et c'est très instructif et enrichissant. Leurs retours sont toujours constructifs.

Nathalie  
Enseignante FLE, France

La méthode ANL apporte la solution aux problèmes rencontrés par beaucoup de professeurs "comment donner sa place à l'oral dans l'apprentissage d'une langue étrangère ?" Cette méthode présente un tout, incluant l'oral, la lecture et l'écriture, sans négliger aucune des compétences langagières à acquérir. Les découvertes récentes en neurosciences confirment les principes de cette façon d'enseigner le FLE ou les autres langues étrangères d'ailleurs.
